PHILLIPS 66® DOT 4 BRAKE FLUID

Phillips 66 DOT 4 Brake Fluid maintains anti-lock braking systems (ABS) and traction-control performance. The brake fluid acts as a hydraulic fluid, transferring power and lubricating brake system components, while also preventing corrosion.

Phillips 66 DOT 4 Brake Fluid maintains a stable viscosity over a wide temperature range and flows easily at the high pressures generated in automotive brake systems to deliver solid, reliable braking.

Features/Benefits

- Exceeds DOT 3, 4 and 5.1 specifications
- Provides maximum protection against vapor lock brake failure
- Maintains a higher boiling point than conventional brake fluids
- Super protection against chloride and zinc corrosion of braking system parts
- Low-viscosity (817 cSt) provides superior cold-weather performance
