

2-STEP POWER STEERING SERVICE KIT

PT#14000S

RLO#1086093

UNIT 4oz/4oz

CASE SIZE 6 Kits/cs

PALLET UNITS 1080

With advanced synthetic technology for use in all power steering services & exchanges.

STEP 1

- Safely Removes Deposits and Impurities From Power Steering Systems
- Cleans All Internal Components: Pumps, Turbines, Pistons, Racks etc.
- Contains No Harmful Cleaners or Solvents
- Will Not Harm Seals, O-rings or Hoses

STEP 2

- Improves Power Steering System Performance
- Eliminates Whines and Noise
- Frees Sticky Turbines and Pumps
- Lubricates and Protects Racks and Pumps
- Eliminates Steering Stiffness
- Extends System and Fluid Life
- Reduces Wear
- Red Line Service Chemical Limited Lifetime Warranty Program coverage (if used every 30,000 miles)*

Restores coolant system performance and efficiency

*See warranty information for complete details

Manufactured for **Red Line Synthetic Oil**

PALLET UNITS 1080

STEP 1 RED LINE[®] POWER STEERING CLEANING ADDITIVE (PT#14002)

RED LINE POWER STEERING CLEANING ADDITIVE is uniquely formulated to clean the entire power steering system, (pump, lines & rack) in all types of power steering systems. It removes varnish, dirt and other harmful contaminants that can build up in the system through time and usage. It safely and effectively cleanses all internal parts and components preparing the system for new power steering fluid. RED LINE POWER STEERING CLEANING ADDITIVE can be used with or without power flushing equipment.

- Safely removes harmful deposits and impurities from power steering systems
- Contains no harmful solvents
- Will not harm seals, O'rings or hoses

RECOMMENDED SERVICE PROCEDURE:

- 1 Remove 4 oz. of power steering fluid from power steering reservoir. Install RED LINE SYNTHETIC POWER STEERING CLEANER. Replace reservoir cap, with the parking brake applied, start engine.
- 2 Turn the steering wheel 5 full rotations. Turn off engine, remove reservoir cap and evacuate used power steering fluid. If evacuation equipment is not available, remove the power steering fluid supply hose and drain reservoir.

STEP 2 RED LINE[®] POWER STEERING PROTECTANT ADDITIVE (PT#14001)

RED LINE POWER STEERING PROTECTANT ADDITIVE with advanced synthetic technology protects power steering systems by reducing wear on internal parts and components by up to 40% over regular power steering fluids alone. It eliminates whines and noise in power steering systems. Its advanced synthetic technology conditions seals and O'rings, protects internal components and reduces wear, while ensuring proper drivability. RED LINE POWER STEERING PROTECTANT ADDITIVE eliminates the need for multiple OEM recommended fluids by converting regular power steering fluid into a universal SLF (Special Lubricating Fluid) to be used in vehicles such as, Honda, Chrysler, Toyota, GM, Ford and others. For Audi and Volkswagen applications follow manufacturers fluid recommendations.

RECOMMENDED SERVICE PROCEDURE:

- 1 With vehicle turned off, remove the power steering reservoir cap. Install RED LINE SYNTHETIC POWER STEERING PROTECTANT. If the reservoir is full remove 4oz of fluid, in order to add contents. DO NOT OVERFILL!
- 2 Replace the power steering reservoir cap and check system fluid level. If using power flushing equipment, follow equipment manufacturers directions. Not recommended for Audi or Volkswagen applications.
