

RED LINE SYNTHETIC POWER STEERING CLEANER

Red Line Synthetic Power Steering Cleaner is uniquely formulated to clean the entire power steering system (pump, lines, rack and pinion) in all types of power steering systems. It removes varnish, dirt, and other harmful contaminants that can build up over time. It safely and effectively cleans all internal components and prepares the system for new power steering fluid. Red Line Synthetic Power Steering Cleaner can be used with or without power steering flushing equipment.

Applications

- For use in all power steering systems

Features/Benefits

- Safely removes deposits and impurities
- Cleans all internal components: pumps, turbines, pistons, racks, etc.
- Contains no harmful cleaners or solvents
- Will not harm seals, O-rings, or hoses
- Prepares system for new power steering fluid

Recommended Service Procedure

- Remove 4 oz. of power steering fluid from reservoir
- Pour in Red Line Synthetic Power Steering Cleaner
- Replace reservoir cap
- With parking brake applied, start engine
- Turn steering wheel 5 full rotations
- Turn off engine and remove reservoir cap
- Evacuate used power steering fluid
- If evacuation equipment is not available, remove the power steering supply hose and drain reservoir
- Fill system with new fluid
